

RadioChico Switzerland – promoting young people’s development!

RadioChico is based on a solid pedagogical concept.

We produce radio and TV programmes ourselves!
We create, try out, test, live and love radio and TV work together. Learn how to design, research, write, and present a programme!

We visit schools throughout Switzerland with our mobile studio. Find out how to best interview people and stick to deadlines!

We broadcast only positive messages and sign a code of conduct. This helps us focus on what is good and beautiful in the world, and spread peace and love of life.

The young people working for RadioChico.ch interviewed a number of people all over the country to find out what they thought about reconciliation: what makes it easier or harder to “jump over one’s own shadow” and work for peace?
